If you have any queries please email: ivy.yen@sydney.edu.au

After we collect all missing papers two reviewers will independently assess them for inclusion.

Inclusion criteria

- Published between **2018-2020.**
- Published in English.
- A full report which documented the results of an investigation and/or secondary analysis of existing data reporting the aim of the investigation, method, findings and conclusions and/or recommendations
- At least one aim of the study related to people with disability.
- Disability research including Australian participants/topics and reporting results on those participants/topics. This included international comparative studies. 'Topics' included in order to capture studies such as those about Australian disability policy, social context and services, where there were no participants.
- The results developed conclusions related to people with disability.

Exclusion criteria

- Not publicly available
- Not written in English.
- Does not contain any original research paper (e.g., commentaries, viewpoints, policy submissions which do not contain research).
- Disability discussed is acute and/or transient (an excluded study would be on rehabilitation from an acute injury such as short-term limb dysfunction after a fracture).
- Research which was primarily lab-based and related to genetics, treatment, diagnosis or cure (e.g., "medical prevention and cure", surgical or clinical) which did not also consider the broader functioning, disability, health and wellbeing of people with disability.
- The aims of the report did not relate to people with disability or disability is mentioned only in passing.
